All-Russian remote Olympiad for students of the younger classes "Genius of Mathematics" Details  
Posted on 07.06.2014 02:27

The training of younger schoolchildren should be based on the principles of accessibility, imagery, visibility, compliance with the age characteristics of younger students. An effective learning method was the attraction of schoolchildren to remote competitions and the Olympiads. Competitions for schoolchildren increase the motivation and clarity of training, the youngest student develops a creative approach to performing tasks.

Educational portal "Protunk" offers users to learn English by Skype or use the methodological library for the initial, middle, high school - it includes developing teachers' practitioners, useful developments for students and teachers, interesting scenarios of events and holidays. "Extension" contains useful information for parents of schoolchildren. With the help of the exercise portal "Prothenka", students of junior classes can take part in the Olympiads in mathematics, Russian language, English, literature, to show their talents in creative competitions or just learn English on Skype with a tutor.

In the remote Olympiad of the "Mathematics genius", students take part 1-4 by the class of all types of schools - general education, gymnasiums, colleges, lyceums. The participant of the remote Olympiad under the leadership of the curator, the teacher or parents is undergoing the registration procedure on the site of the Educational Portal "Extension". The application for registration indicates the full name, the class in which the schoolboy, school, city, data on the curator.
